

KINDERGARTEN NEWS FOR MAY/JUNE

Parents,

Well, this is it! My final Newsletter of the year! Wow, did it ever go FAST! We certainly packed a lot of learning in though!

We definitely have a lot more to pack in to a little over a month! Our studies will center around **animals** of all kinds. This theme will be integrated across the curriculum. We will start with **insects**. Our caterpillars will be arriving soon and we will watch them turn into butterflies, so that is very exciting! Then we will move on to **pets**, so you may want to consider bringing your own pet in for a visit! From there we go **WILD** and our dramatic play area will be transformed into a tiny zoo! We will end the month with **sea life!** June's theme will be summer and saying goodbye.

Math will include more on telling time, coins and story problems along with all of the "kinder concepts" being reinforced. We will continue to work on our books entitled "My Kindergarten Year", journals and more books in **Writing Workshop**.

Along with all of the above, we will be doing a special project for Mother's Day and getting ready for our Spring Program Graduation! Whew! That about covers it!

Thank you so much for entrusting me with your precious kiddos this year! They have been such a fun group and will definitely always hold a special place in my heart. I really do hope you keep in touch and bring them back for visits!
